LOOK at the glorious hedge of roses in the reproduction above. Picture it in your own yard. You'll surely want this selection. The harvest of blooms they'll give the first year is worth many times their small cost. It's a combination of Teas and Hybrid Teas, that, for general planting, excel all other types of roses. All will bloom this year—the two year size, of course, yielding a greater profusion of flowers. These wonderful roses are noted for their exquisite coloring and delightful fragrance. And they're so sturdy you can't help but succeed with them.

Hydrangea Paniculata Grandiflora

A great favorite, and there is nothing finer or more showy whether for planting in large masses in parks or for single plants on the smaller lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. Strong flowering plants, for immediate effect, two-year-old, 50 cents each.
